The samples detailed on this report were considered to be in a satisfactory condition on receipt, unless otherwise stated. Tests marked "#" in this report are not included in the UKAS accreditation of the laboratory. Tests marked "*" were tested according to the ISO 17025:2005 standard by a subcontract laboratory. Tests marked "**" were tested using a non-accredited method at a subcontract laboratory. Tests marked "\$" were tested using Marks and Spencer compliant methods at a subcontract laboratory. Opinions and interpretations contained herein are outside the scope of UKAS accreditation. Calculations of energy values are performed according to Regulation (EU) No 1169/2011 that takes into account contribution from dietary fibre where requested. Unless reported, alcohol, polyols and organic acids have not been considered in the energy calculation. Calculations of meat content are performed according to Meat Product Regulations 2003 (amended 2008) and are not applicable to QUID regulations. Meat contents are corrected for cereal fillers where known to be added, but are not corrected for other sources of protein including; soya; caseinate; milk powder and non-meat sources of fat. Meat content may be an overestimate if connective tissue analysis is not requested. "<" means less than. ">" means greater than. "ND" means not detected. "e" means a microbiological count is estimated. "Pres" means presumptive.
